Session 1 will focus on the Tournament of Minds program in all disciplines. This workshop covers the basics of TOM and the skills needed to facilitate a team, including team building, explaining the program to your students and the skills students develop as a result of their participation in the program.

Session 2 will introduce the new STEM focus for 2016. Consultants from the AIS will provide the latest updates on the STEM focus in schools.

Nationwide there is an increased focus on STEM capabilities and how it is important to create authentic, meaningful connections between Science, Technology, Engineering and Maths. We will investigate these links and how we can enable children to think logically, critically and creatively so that they are able to solve the real world problems that TOM presents to teams.

Tournament of Minds (NSW Inc) is offering a Facilitator Workshop to introduce the 2016 program to schools.

Tuesday 22nd March 2016, 9am – 3.30pm
@ The Association of Independent Schools | Lvl 12, 99 York St, Sydney
